PACKAGING

Production Process

Whether it designing, conceptualization, mould making, vacuum forming, glassfiber insulation, final testing and assembly, Colston has the complete manufacturing facility process under one roof in a fully integrated plant.

Technology & innovation

Colston has taken a lot of measures to introduce latest technology and Innovative products in the markets. Colston recently comes with technologies like Vitamin bath shower, Scottish shower, 3d circulative opposite hydro-massage, Large led ceiling shower with chromatherapy, Chemical-free micro-nano bubble skin care system.

Make in India Initiative

Driven by 'Make in India' initiative, we at Colston have decided to design and develop range of wellness products like Waterfall Bath, Showers, Faucets, Steam Generator of High quality, suitable to Indian and international environment conditions.

Materials

Sanitary acrylic is a special synthetic material, created to manufacture whirlpools. Acrylic surface is specular and durable. It provides long life, easy care and hygienic requirements for whirlpools.

Extra stability to whirlpool provided by thick fiberglass reinforcing layer – 4 mm, in the whirlpool base – up to 22 mm thick. Thus, there is no risk of bending or breakage.

Polyurethane foam coat for additional heat, sound insulation and mechanical resistance. Stable metal frame with adjustable feet – easy to dismantle and fold for installing in small bathrooms. Easy to install and dismantle decorative panels. It enables easy cleaning and technical maintenance.

- 20 mm reinforcement layer allows to safety install water mixer
- 4 mm PMMA acrylic provides for safe and durable maintenance of whirlpool
- 3-5 mm GRP reinforcement gives strength to whirlpool
- 10-15 mm HEAT layer provides for additional heat and sound insulation
- Steel frame for whirlpool bottom and perimeter ensure stability
- Decorative panels with easily removable, comfortable and secure fittings
- Up to 22 mm reinforcement layer at the bottom secures permanence of the whirlpool shape

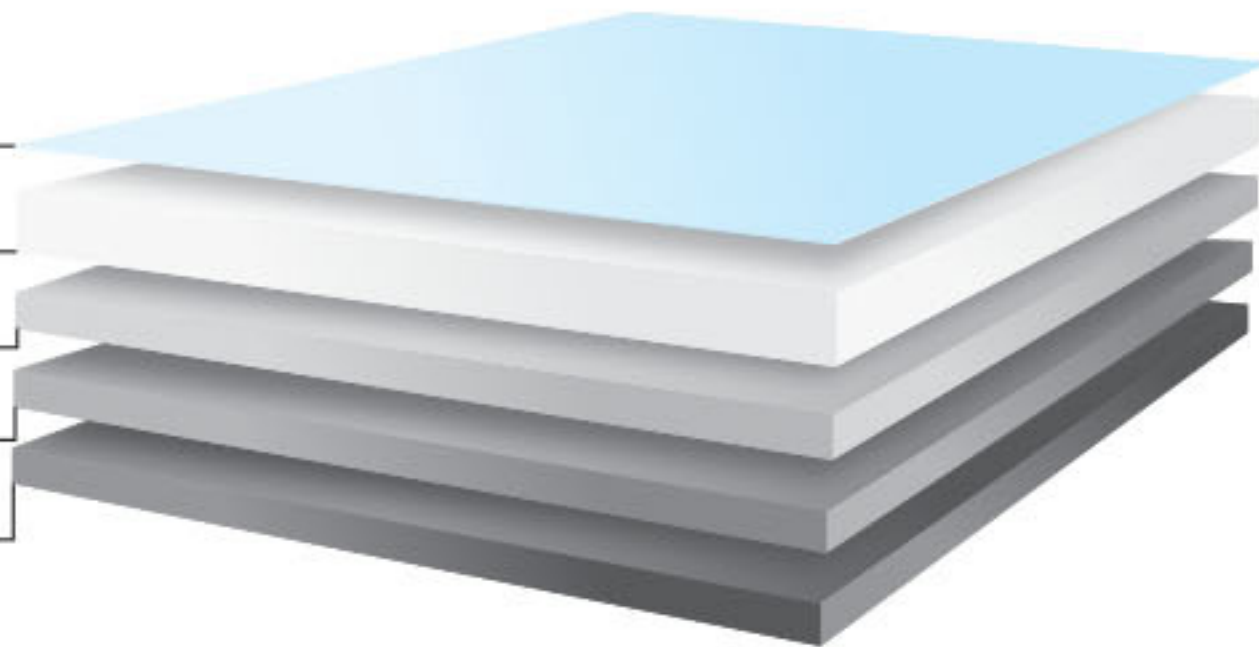

NANO-COATING layer

Double layer of acrylic (up to 6 mm)

Fibreglass and resin (layer 1)

Fibreglass and resin (layer 2)

Reinforced bottom (on a steel frame)

QUALITY AND ENVIRONMENTAL CARE

Colston whirlpools are out of coextruded material: a high quality and durable material, easy to clean and maintain. Our products are green by definition, as our production process allows the recycling of the scratches, thus reducing the environmental impact.

HYGIENE

Colston idromassaggio whirlpools are fitted with an exclusive system, blowing after, which empties the air lines of any residual water by blowing air through the system after the whirlpool has been drained, thus offering maximum hygiene. When required, Colston whirlpools are equipped with a semi-automatic disinfection programme for cleaning the nozzles and the whirlpool circuit with a sanitizing liquid filled into a special tank.

Note: Thickness of the acrylic and reinforcement can vary according to model of whirlpools and hot tubs.

Colston whirlpool: hydromassage systems

Colston whirlpools are equipped with different hydromassage systems, to better answer your needs.

The specific **Whirlpool nozzle**, with exclusive performances that increase the effectiveness of hydromassage, can be easily adjusted to vary the direction and intensity of the jet to better suit personal needs. It also can be easily disassembled for deeper cleaning.

The **Airpool nozzle** in the bottom of the whirlpool is flat and minimal to increase comfort during the bath.

Some whirlpool models are fitted with a specific directionable nozzle, **JET PLUS**, focusing on back and feet zones, that makes the massage experience more intense and revigorating.

WHIRLPOOL SYSTEM: Mixed air and water flow out of the directionable jets, which direction may be adjusted and intensity can be varied to stimulate the blood and lymphatic circulations.

The Pulsating **Whirlpool function** alternates a softer to a more dynamic massage, similar to the sensations given by the sea waves.

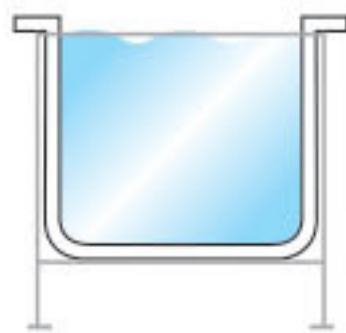

AIRPOOL SYSTEM: Air bubbles are released from the air nozzles positioned at the whirlpool bottom, for a delicate and caressing massage.

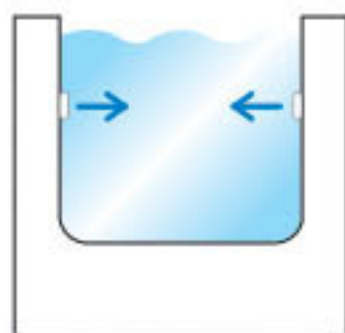

The Pulsating **Airpool** function alternates a softer to a more dynamic massage, similar to the sensations given by the sea waves.

FEATURES

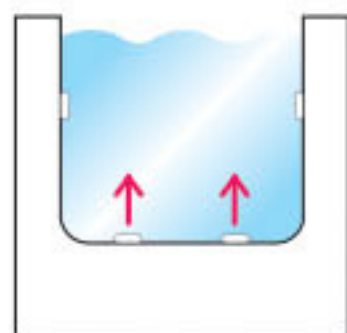

Colston whirlpool can be equipped with taps and fittings installed on the whirlpool rim, with manual or thermostatic mixer, water inlet or inlet with overflow. The Colston wellness experience can be completed by some comfortable headrests, underwater light or chromotherapy and, on some models.

Spaces in which you can care for yourself. Systems with professional features in which you can experience the beneficial effects of water, steam and heat, the appeal of the materials and the practicality of the space. Spaces in which you can care for yourself. Systems with professional features in which you can experience the beneficial effects of water, steam and heat, the appeal of the materials and the practicality of the space.

Sauna bath creates a dialogue between the natural vibrations of our body and the sonorous vibrations of the wood, so that we feel cradled and cuddled in a harmonic environment where words and emotions are propagated in an atmosphere of pure pleasure.

In shower areas and in whirlpools, water at different intensities and with different effects, and air through a myriad of sparkling micro sprays, create a unique experience.

Spaces in which you can care for yourself. Systems with professional features in which you can experience the beneficial effects of water, steam and heat, the appeal of the materials and the practicality of the space.

Outdoor Hydromassage Systems

STYLISH DESIGN

The outdoor hydromassage systems by Colston have a sophisticated stylish design, impeccable finishes and perform to the very highest standards. The designer style panels in the range have an understated and refined appeal and are all produced using top quality materials so you can choose the finish which best suits the décor of your home or the style of your garden.

THE POSITIONS OF WELL-BEING

Every ergonomic Spa seat is fitted with different Jets of varying intensity, positioned to stimulate and relax specific parts of the body. By changing the combinations of Jets in the seats, you can relax with a soft, soothing massage or be rejuvenated with a toning, destressing massage.

Neck, shoulders and mediodorsal muscles: Massage localised on the points where stress is usually felt most.

A massage of the neck and trapezius muscles relieves the tension caused by a sedentary job or constant car or aeroplane journeys.

Feet, calves and thighs: The thighs and the rest of the legs benefit in particular from these Jets.

General massage: The Jets located on the bottom of Spa produce a delicate swirling massage.

CLEAN AND HYGIENIC, ALWAYS

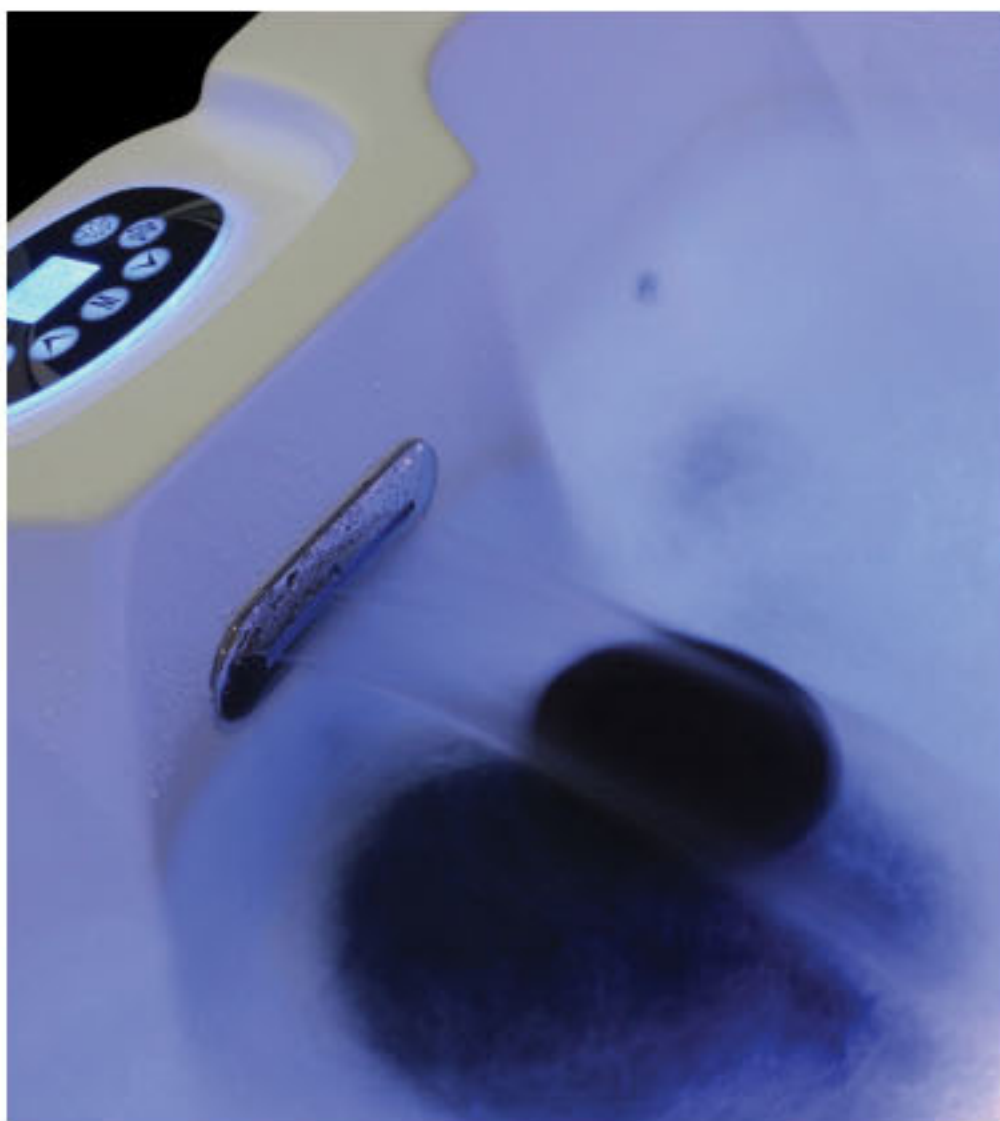

Whether your outdoor hydromassage systems is used for domestic or professional purposes, keeping the water scrupulously clean is an essential requirement.

The large filtering surface of the cartridge filters installed on every pump in the spas, ensures the water is cleaned quickly and effectively.

All the Colston outdoor hydromassage systems models are fitted with a filter which provides superior filtration and, as a result, incomparable cleanliness.

The ozone system increases the effectiveness of the filtration, it neutralises bacterial growth and guarantees maximum hygiene.

The internal shape of system also means it can be emptied completely, making it easier to clean and service.

INSTALLING A SPA, IT COULDN'T BE EASIER

The system features a strong steel structure that ensures quick installation, long-term durability, and protection from external elements. Adjustable feet on both the system and its pack allow easy leveling and a hassle-free setup on any surface.

SUSTAINABLE WELLBEING

Colston outdoor hydromassage systems are insulated with closed cell expanded polyurethane, restricting heat loss and thus guaranteeing energy savings. The version with heat exchanger, available for the Spa models, delivers further energy savings and speeds up the time needed to heat the water. The wooden perimeter structure keeps vibrations to a minimum and the sound-absorbent panels around the sides and on the bottom of the system models help improve sound insulation, making the whole spa experience even more enjoyable. The insulating cover helps keep heat in, prevents the filters from premature wear and tear and protects Spa from leaves, insects and impurities.

LONG-LASTING WELLBEING

Colston outdoor hydromassage systems are designed to last, thanks to the top rate materials and technologies used in its construction which are certified for their strength and safety. The high quality standards of the systems make these products ideal for both domestic and professional use.

COMFORT

Colston outdoor hydromassage systems is always ready to use: the system automatically keeps the water temperature constant. The water remains in the system for long periods of time and is always clean and sanitised thanks to the filtration and ozonisation system. The only time you need to completely empty the spa is when it is not going to be used for a long period of time.

Hydromassage systems is easy to get into, thanks to the step built into the shell. The outside steps, available in the same finish as the panels, also makes entering into system safe.

Ergonomic seats, soft padded headrests and easy, intuitive controls are guaranteed to make your spa experience truly gratifying.

And your wellbeing will be complete with the chromotherapy function and preset programmes and hydrotherapy, which lets you gradually release your favourite essence through the air pool circuit.

The optional **Bluetooth** entertainment system, fitted with concealed vibrating loudspeakers, enables you to use your own audio device for high quality sound.

HIGH-QUALITY SHELL

Colston outdoor hydromassage systems uses the highest level acrylic materials for shell, which provide the most reliable protection for scratches, abrasion and UV, to give you a longer lasting color.

The system shell is vacuum formed in our hi-tech factory. Then we use our special formula to reinforce with G.R.P.

EFFECTIVE ENERGY-SAVING

We use high-density polyurethane foam material, which is widely used in production of commercial refrigerators. It protects the shell and pipes from heat loss, and reduce noise and vibration.

NATURAL BEAUTY AND LOW MAINTENANCE

We use a maintenance-free polymer cabinet which has natural beauty and solid structure, whics is available in several colors.

STAINLESS STEEL FRAME

The frame of sysyem is made of high strength stainless steel tube, You will not find a frame stronger and more durable in the world.

HIGH-QUALITY PIPE

We choose high pressure plastic pipe which is robust and strong and it can last to keep clean and stop bacteria growth.

- ✓ Manifold plumbing
- ✓ Maintenance-free polymer cabinet
- ✓ Heat trap foam insulation
- ✓ Stainless steel frame
- ✓ Gate valve for easy maintenance
- ✓ High-pressure plastic pipe
- ✓ MP water filtration system
- ✓ Clamp fit for all flexible pipes

ACRYLIC SHEETS

Colston outdoor hydromassage systems uses the highest level acrylic materials for shell, which provide the most reliable protection for scratches, abrasion and UV, to give you a longer lasting color.

COLORFUL LED LIGHT

A good decoration for massage system. When you use the system, turning on the colorful light, the whole system becomes more transparent, with the change of color to make your mood better.

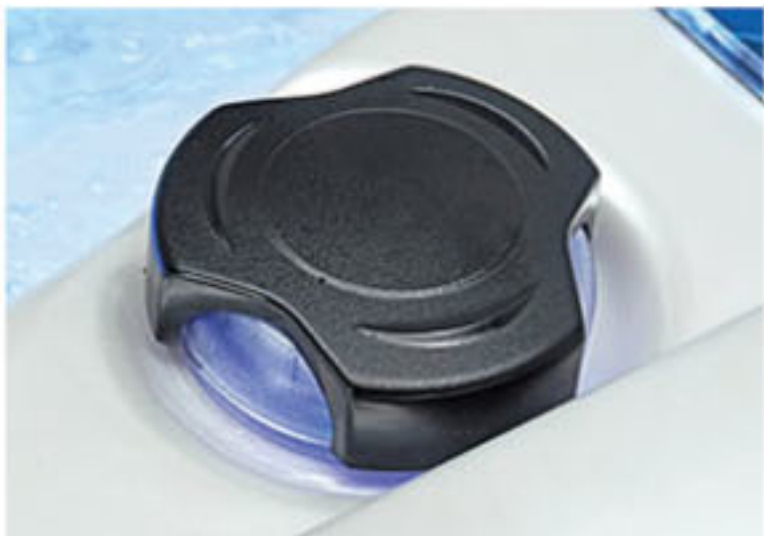

MASSAGE JET

Jets are an essential feature of outdoor hydromassage systems. Powerful, efficient massage jets can let you get better massage effect when using the system, making your body stimulate vitality, becoming more healthy.

DIVERTER

The function of the diverter is to adjust the flow direction of the massage jets, so that the jets power can be adjusted then can make the power suitable for adults and children to use.

CONTROL SYSTEM

Colston outdoor hydromassage systems equipped with most advance control system, that enable you to use maximum advantages of system and customized as per your requirement.

HIGH POWER WATER PUMP

Powerful water pump have high speed, powerful, continuous and effective. Providing power to massage jets and filtration.

The OCTRA 5X elevates every moment with its immersive jets, glowing LED ambiance, and ergonomic comfort—creating a wellness space where relaxation feels effortless and luxury feels natural. Its deep seating layout is designed to support the body while delivering targeted hydrotherapy for complete rejuvenation. The advanced water-flow architecture ensures a consistently smooth, soothing massage experience. With thoughtfully integrated controls and refined aesthetics, it transforms any outdoor space into a personal retreat. Perfect for those who appreciate both performance and elegance.

FEATURES:

Bluetooth Connectivity
An advanced Bluetooth audio system transforms your spa time into a soothing sonic escape. Effortlessly connect your smartphone or device and unwind to rich, immersive music that elevates every moment of relaxation.

Whirlpool Massage Jet
Whirlpool massage jets envelop your body in dynamic, swirling water pressure that delivers a deep hydromassage. The rhythmic motion helps ease muscle tension, improve circulation, and promote overall relaxation—enhancing both physical comfort and mental well-being.

Airpool Massage Jet
Airpool massage jets release soft, bubbling air streams that create a gentle, full-body massage. This soothing aeration helps relax muscles, improve circulation, reduce stress, and promote an overall sense of lightness and well-being.

Water Column / Waterfall
The waterfall flow delivers a calming, cascading stream that relaxes the neck and shoulders, while the water column adds a focused boost of targeted relief for a refreshing hydrotherapy experience.

Underwater Chromotherapy
Chromotherapy integrates therapeutic illuminated lighting to influence mood and energy levels, supporting relaxation, stress relief, and overall mental wellness.

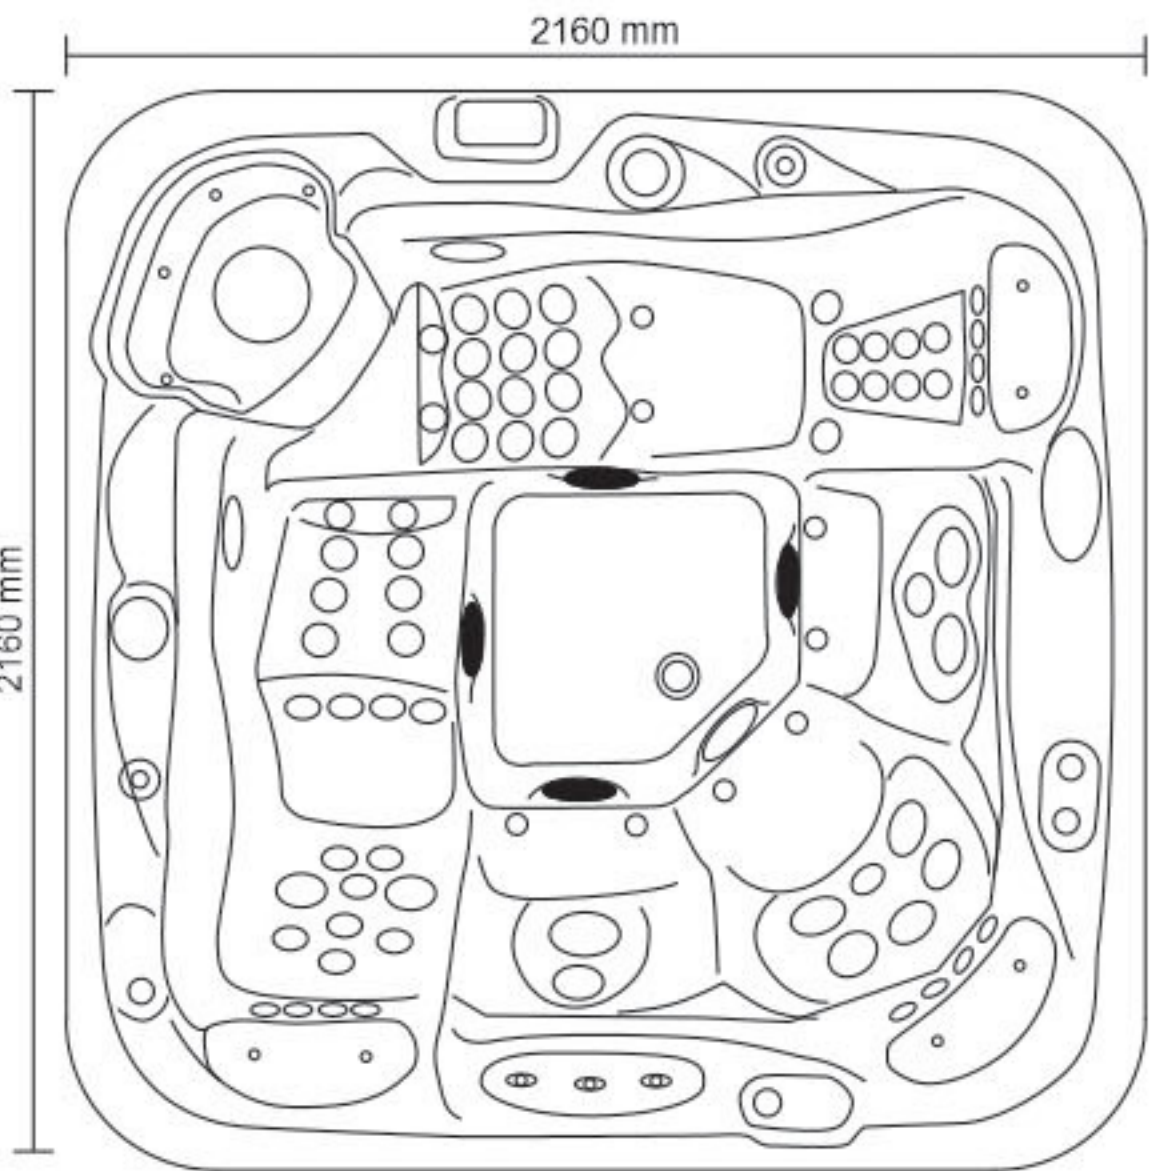

Ozone Water Treatment System
It's keeps the water clean and bacteria-free, the pool water can be reused again and again, ensuring a hygienic, low-maintenance, and efficient swimming experience.

Manifold Plumbing
Manifold fittings are PVC parts in a Spa that split up the water/air flow from the pump to the jets. The main pump line is thus reduced into several sub-lines that connect directly or via another manifold to individual spa jet lines.

Heat Trap Foam Insulation
Better insulation reduces the amount of work your spa has to do to heat the water and keep it hot. Water that stays hot not only increases owner enjoyment it also lowers energy use – and therefore your utility bill.

Stainless Steel Frame
The steel frame provides greater structural integrity than wood, as well as superior corrosion protection. Stronger, more durable, and ideal for the environment – it's the obvious choice for a lifetime of worry-free fun.

Maintenance-free Polymer Cabinet
ACP cabinet offers unparalleled look, texture, and performance. Our ACP cabinet is maintenance free. It features custom rounded corners and removable panels for access to all areas inside the spa. Cabinet is moisture and impact resistant, therefore it doesn't crack or fade. It is also sound proof and flame retardant.

FREESTANDING BATH

Step into an atmosphere of unparalleled luxury with the latest freestanding bath from **Colston**. Each piece is a modern, elegant statement, specifically designed to inject a true "Wellness dimension" into your home. This collection is for those who seek to furnish their bathroom with distinction, offering a personal retreat that delivers a daily perception of living in a unique, harmonious, and deeply relaxing space.

Shaping Style. Inspiring Living

Design is a language of visual communication, and the shapes within it play a pivotal role in conveying messages, evoking emotions, and leaving a lasting impression. Iconic designs and shapes have the power to transcend time and cultural boundaries. In this article, we will delve into the art of creating iconic design and shapes, exploring the principles and techniques that make them timeless. Your bathroom is more than just a functional space; it's a sanctuary where you begin and end your day. In recent years, the concept of a designer bathroom has gained immense popularity. It's all about creating a luxurious and aesthetically pleasing oasis that reflects your unique style.

In Infrared Saunas, The major difference is the heat source; in this case it's infrared heat. Our range of Infrared Saunas offer ultimate comfort and relaxation. Using this unique heat source to provide a clean and dry beneficial heat.

Infrared Saunas are designed to deliver a number of relaxing benefits and could also be used to aid with:

- Relieving muscle tension
- Assisting with relaxation and rest
- Detoxing
- Promote wellness

Our Infrared Saunas come fully equipped with a control panel that allows you to set the sauna to your perfect temperature. The control panel also offers a variety of functionalities from Bluetooth to setting your sauna's timer. The control panel makes Wellness Saunas easy to operate, and to program your perfect sauna experience.

TRADITIONAL SAUNAS

VS

INFRARED SAUNAS

Heat 150 - 170 degrees F

Heat 110 - 135 degrees F

More superficial heating

Deep superficial heating

Sweat happens at higher temperatures

More Sweating at lower temperatures

Requires more power

Requires less power

Uses a heat stove as a heat source

Uses infrared light in panels as a heat source

More humidity control

Less humidity control

Perfect sauna rooms are made of top material. We choose world top natural wood, high quality culture stone & safe tempered glass as our materials.

Hemlock wood with the characters of soft wood, natural high corrosion & excellent stability & long life, it can used as decoration of external wall of high-end villa. Colston choose A level Hemlock wood without wood knots to make elegant sauna rooms.
